

1 HOW TO INSTALL RHINO 7 OR 8 AND GRASSHOPPER

Rhino & Grasshopper make use of a network license, so make sure that when you are downloading and using the programs, you are either on the TU/e campus or connected to the VPN.

- Go to <https://www.rhino3d.com/download>
- Download the full version of Rhino 7 or 8
- Open Rhino 7 or 8
- Enter your TU/e email address and agree to the conditions, and click next/OK
- In the "Prepare to License" step, click on "Options" in the left-bottom
- Click on "Use the LAN Zoo"
- Check the second option (Use the Zoo server with the following hostname or IP Address)
 - Enter **rhinoceros.lic.tue.nl** as the server and click on "Continue" (Make sure you're connected to the VPN if you're not on campus)
- If correctly, Rhino will open in a few seconds under an "Educational License key".
- Grasshopper comes with Rhino 7 and 8; no additional downloads required!

If you encounter any difficulties, feel free to contact us at the KOers desk in VRT2.27 or to send an e-mail to koers@tue.nl!
